sale of Azaleamum.

Over 600 flowers
blooming at one time
on one plant first year—over 4,000 sec-
ond year—what a record! This is actual
count—no guesswork.

More Than Three Full Months of Bloom

The World's Greatest Flowering Plant

Actual count of an average flower-
ing Azaleamum sets following record:
Four months after planting in spring
of 1932, 635 fully opened flowers
were counted at one time. This heavy
blooming continued for 3 months.
Plant measured 32 inches across and
24 inches high.

September 16, 1933, 4,212 fully
opened flowers were actually counted
and the plant had already been bloom-
ing profusely for 6 weeks—plant 48
inches across, 30 inches high. Each
year at time flowers were counted,
there were nearly as many buds yet
to open as there were flowers then
blooming.

Attractive Color Changes

You'll love Azaleamum for its
many gorgeous flowers and their at-
tractive color changes. The flowers
open a deep orchid-pink, then color
changes to light orchid with creamy
center. Next change, salmon-pink
with suffused yellow center. The
above picture was made before any
color changes took place. Plant grows
compact and flowers open in clusters
on 12- to 15-inch stems. Beautiful for
bouquets.

Azaleamum is the glory of the rock
garden and the sensation of the flower
garden. Azaleamum gives you more
flower beauty for your money than
any other plant you can buy. Azalea-
mum is the world's greatest flowering
plant. (Prices above, right).
